

NOTICE TO ALL HPC USERS

New Feature: View Your Cluster Usage in the Login Portal

We are pleased to inform you that a new feature has been introduced in the HPC User Portal to help you track your computing resource usage more effectively.

You can now view your individual cluster usage statistics directly from your login portal.

What's Shown?

You can now see the following usage details for the selected report period:

No. of Jobs Submitted

Total number of jobs you have submitted.

CPU Units Requested

Total CPU units requested by your jobs.

CPU Units Utilised

Total CPU units actually utilised.

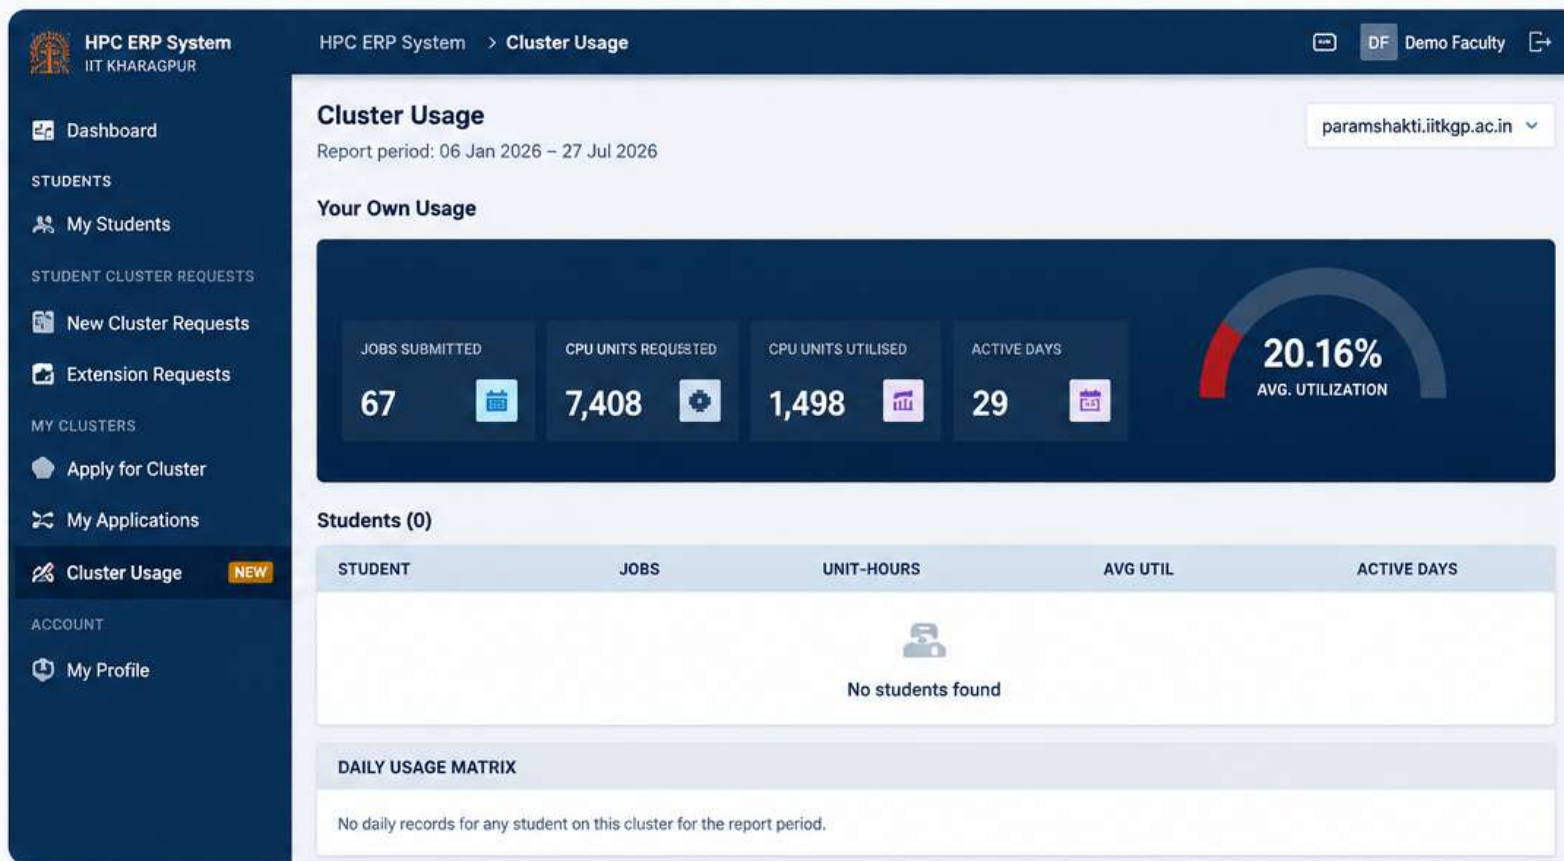

Average Utilization (%)

Your average CPU utilization percentage.

This feature is designed to help you monitor your usage, plan your computations better, and ensure fair usage of shared resources.

How to Access?

Log in to the HPC User Portal and navigate to "Cluster Usage" from the left-hand menu.

Need Help?

For any queries or assistance, please contact the HPC Support Team.

✉ hpc@iitkgp.ac.in

Thank you for being a part of our HPC community and helping us build a high-performance and collaborative research environment.
